-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 24 January 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

Art Unit: 3744

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 11, 12, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Love in view of Broadhurst. Love discloses an ice maker partitioned into an upper chamber and a lower chamber by plate 20. The upper chamber includes the freezing unit 22, first water supply pipe 44, and first drain pipe 68. The lower chamber includes the feed water receptacle 32, second water supply pipe 16 connected to the first supply pipe 44, and second drain pipe 66 connected to first drain pipe 68. The housing is considered to be inherent, and furthermore is obvious in view of Broadhurst, which teaches a housing for the freezing unit and the water receptacle.

3. Claims 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Love in view of Broadhurst as applied to claim 11 above, and further in view of Woodward. Love as modified above by Broadhurst discloses the claimed invention except for the water purifier and sterilizing light. Woodward teaches a water system which includes a water purifier and a sterilizing light. It would be obvious to provide the water system of Love with a water purifier and sterilizing light, in view of Woodward, for the purpose of using purified water in the ice maker.

4. Claims 17-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Love in view of Broadhurst as applied to claim 11 above, and further in view of the admitted prior art. Love as modified above by Broadhurst discloses the claimed

Art Unit: 3744

invention except for the type of ice maker used. The admitted prior art of Fig. 1 teaches a well-known ice maker having a plurality of freezing cells and freezing fingers which are dipped into the cells. It would be obvious to substitute, for the ice maker of Love, an ice maker having freezing cells and freezing fingers which are dipped into the cells, in view of the admitted prior art, for the purpose of providing ice pieces of a predetermined size and shape.

5. Claims 13 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 1-10 are allowed.

7. Applicant's arguments with respect to claim 11 have been considered but are moot in view of the new ground(s) of rejection.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3744

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
